SECOND YEAR B. TECH THIRD SEMESTER

COMPUTER SCIENCE AND ENGINEERING DEPARTMENT

PROJECT REPORT (OOPs)

BST Visualizer

SUBMITTED BY

Aman Kumar Sahu - BT21CSE005

Ayush Kumar – BT21CSE014

Riddhesh Patil – BT21CSE031

Rohit Shinde – BT21CSE032

UNDER THE GUIDANCE OF

Dr. Puja Gudadhe

Adjunct Assistant Professor, Department of CSE IIITN

Indian Institute of Information Technology, Nagpur

(An Institute of National Importance by Act of Parliament)

2022 - 2023

OBJECTIVE

To study and visualize Binary Search Tree.

BACKGROUND OF PROJECT

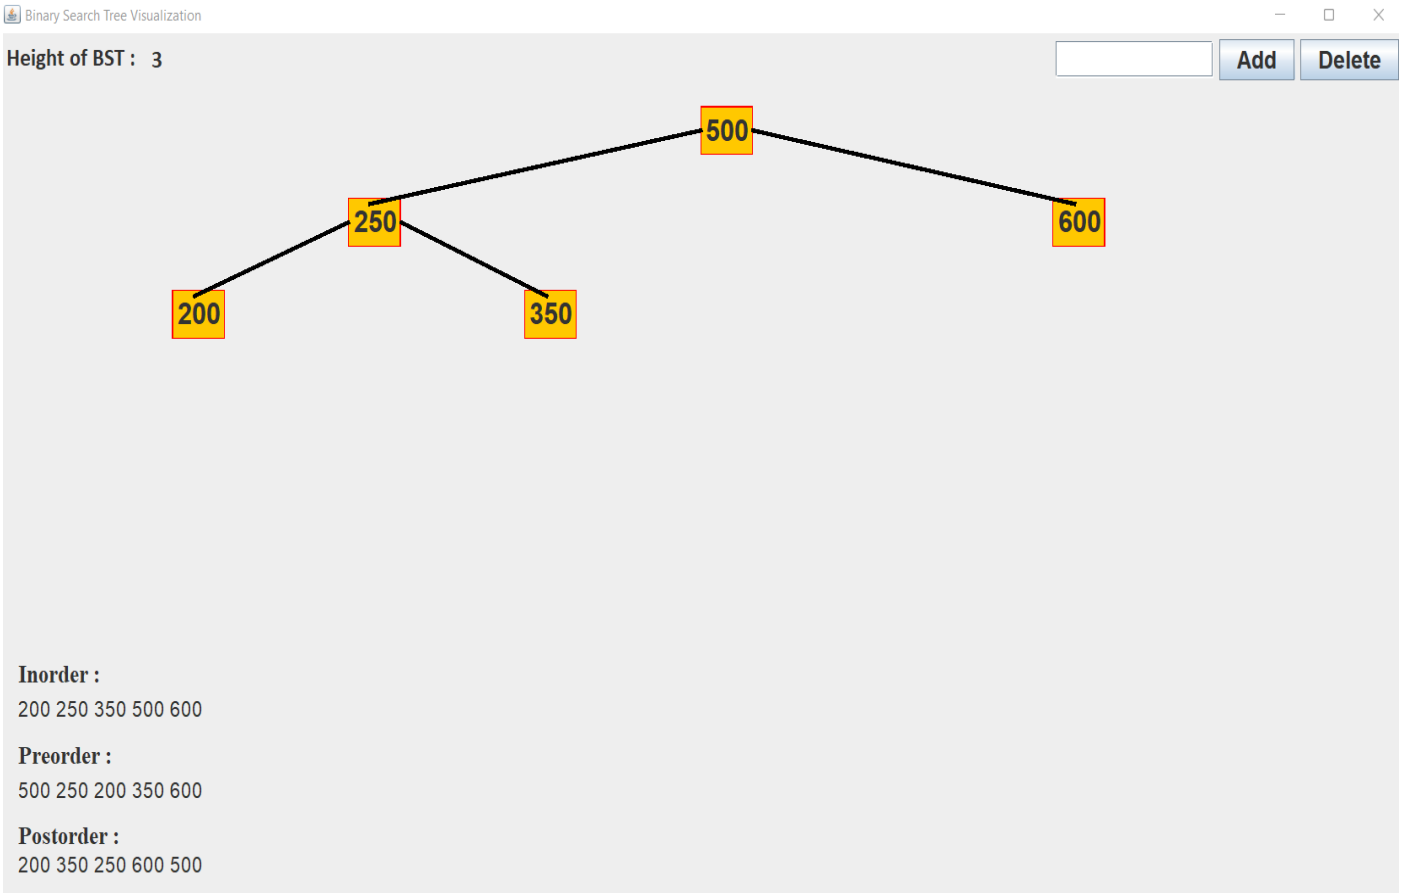
- To visualize Binary Search Tree through real-life demonstration using GUI.
- To add data into Binary Search Tree
- To delete data from Binary Search Tree
- Representation of Binary Search Tree in form of various traversal techniques like inorder traversal, postorder traversal, etc
- To view the height of Binary Search Tree

METHODOLOGY

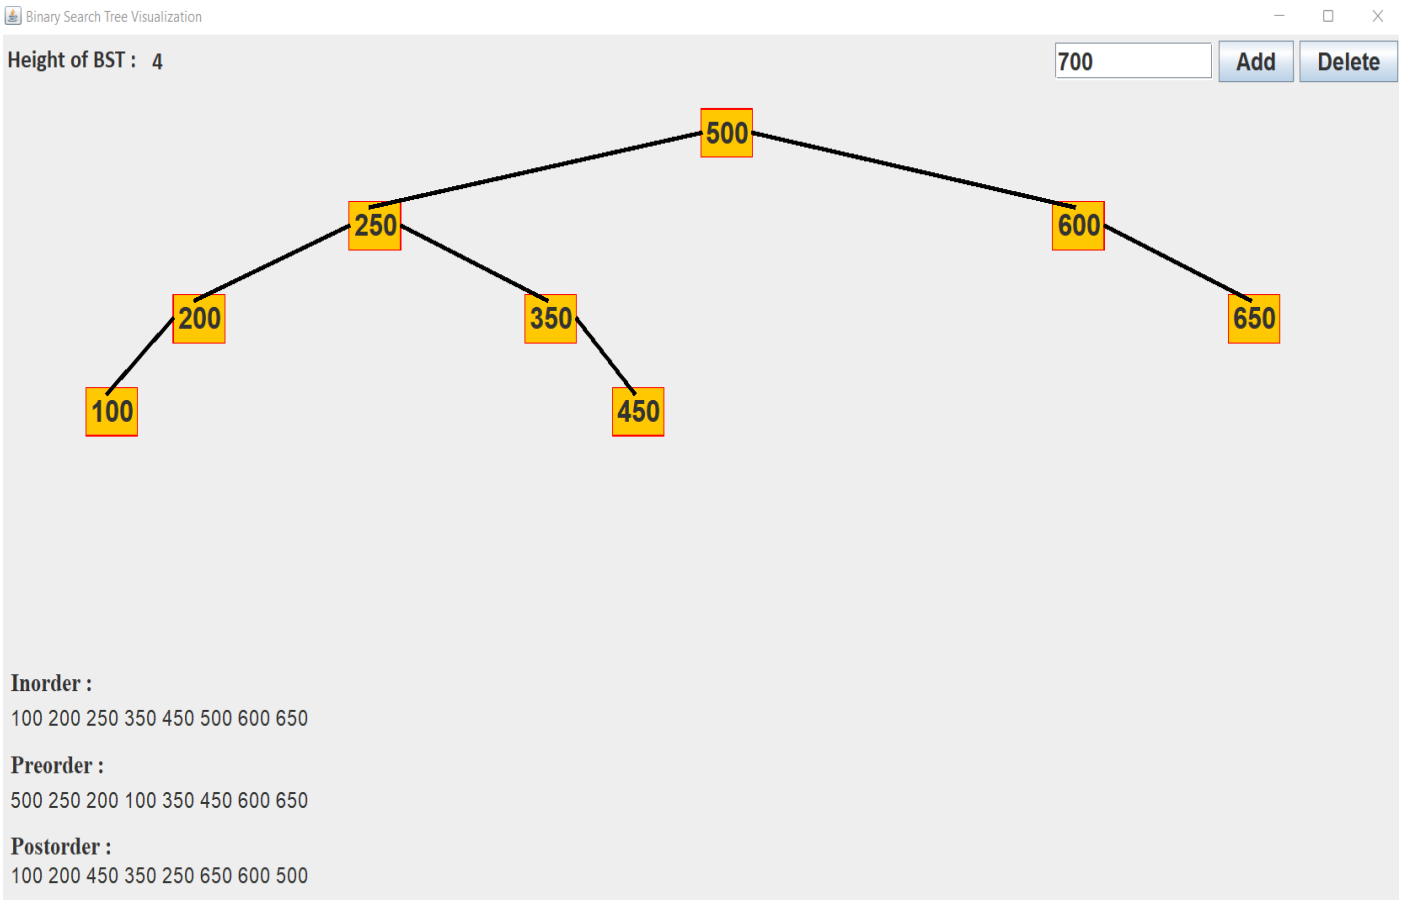
- Object Oriented Programming
- JFrames
- Binary Search Tree (Data Structure)

EXECUTION

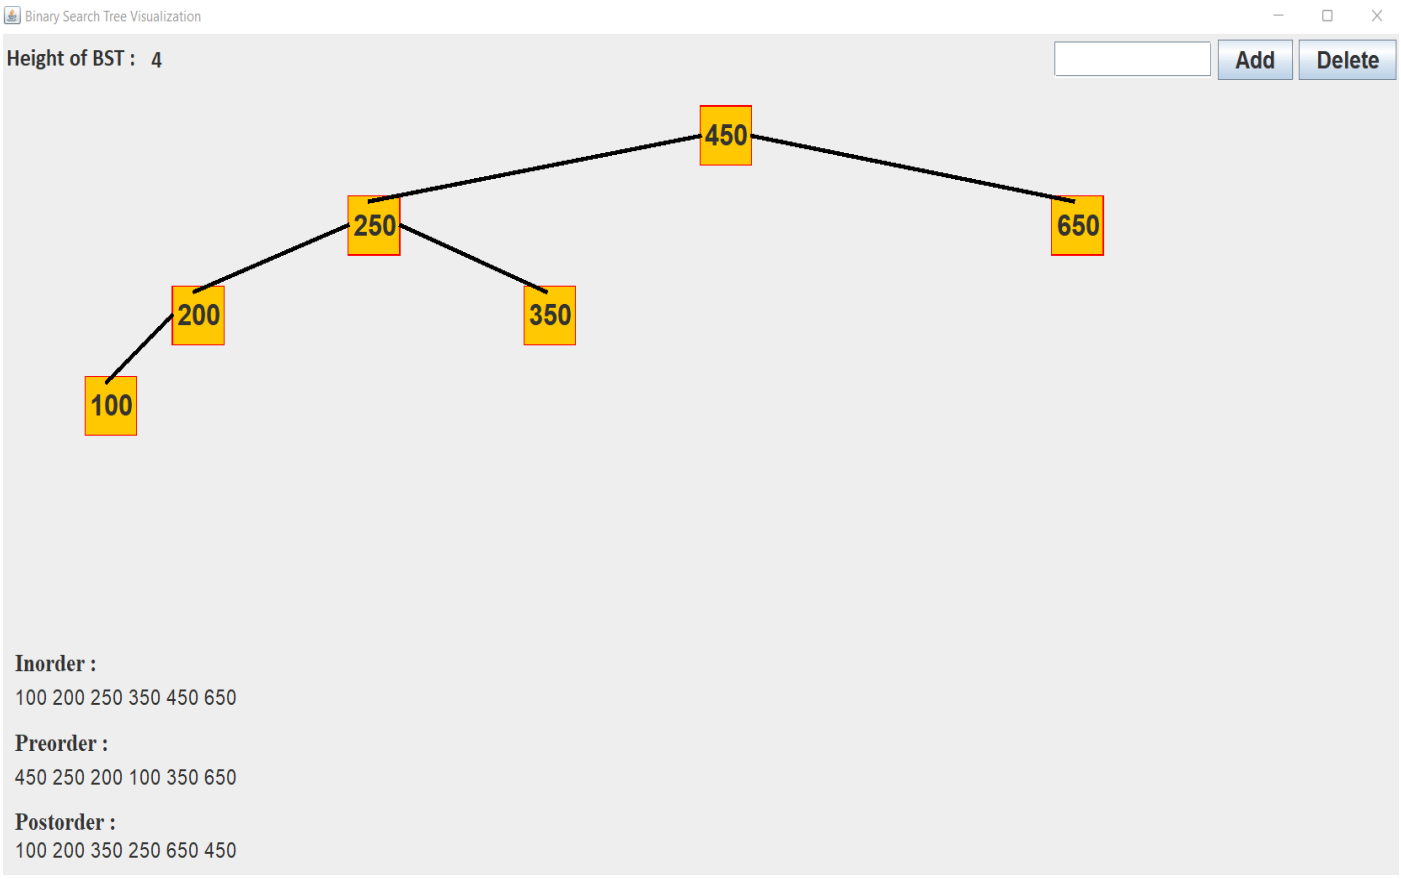
- Initial Representation of BST in GUI



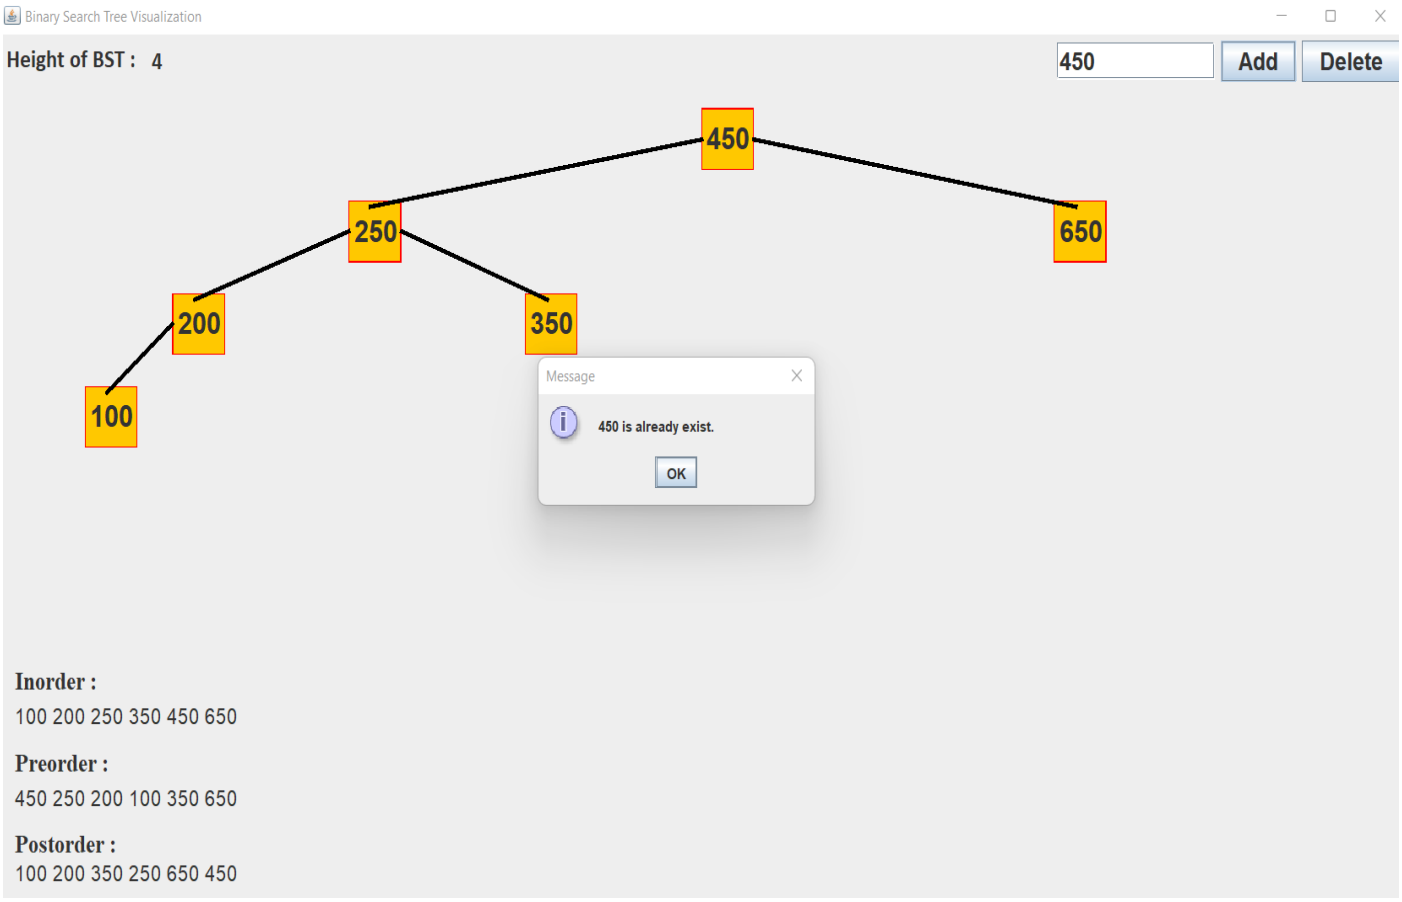
- After **INSERTION** of some elements in BST



- After **DELETION** of some elements in BST



- **ERROR MESSAGE** when the data to be inserted in BST already exists



- **ERROR MESSAGE** when the data to be inserted is a special character
